

AMEGA

PRESENTATION OF THE COMPANY

About Group of company AMEGA

- AMEGA is a group of companies with a central office in Tashkent (Uzbekistan) and representative offices in Almaty (Kazakhstan) and Bishkek (Kyrgyzstan). The main office of AMEGA has been located in Tashkent since 2022, and become a resident of IT Park Uzbekistan.
- A team of more than 100 specialists who have been developing their skills in implementing complex ERP, EAM, BI products in holdings and manufacturing enterprises for more than 10 years.
- The official partner of the 1C company, with all the relevant statuses of the corporate market (1C Competence Center: ERP, CORP, Consulting).
- It has the status of a partner in the implementation of BI solutions based on Qlik, as well as partnerships with Datanomix, a leader in BI solutions in the CIS in the public and corporate sectors.
- Our employees regularly improve their skills and undergo certification.
- We are making the most complex projects for the implementation of ERP, EAM, BI systems at Asian's region.

AMEGA

Our specialization is multi-module solutions of the company «1C» (ERP, EAM и etc.)

datanomix

International awards :

- ✓ WorldCommerce & Contracting Innovation & Excellence Awards 2021 –global winner
- ✓ Qlik Data Transformation Awards 2021
- ✓ World Justice Challenge 2022
- ✓ World Procurement Award 2022

Our difference with our partners on the market

1. The only integrator that specializes in the implementation of ERP and EAM solutions 1C (UPP, ERP, maintenance and repair, management, management, industry products for ERP) in combination with business intelligence based on QLIK in Central Asia.
2. We provide a full breakdown of the cost of the project. We fix the project budget without a hidden increase in case of need for additional functionality.
3. We use a unique author's methodology for the implementation of corporate projects, which allows us to implement projects for 1-3 months than other partners.
4. We advise the customer on providing technical support with internal resources (recommendations on the selection of full-time IT specialists, their development, training, transfer of knowledge on the system, provision of technical descriptions of improvements, etc.).
5. We do not limit the customer in the amount of system improvement - there will be exactly as many iterations with improvements as necessary to fully ensure the functionality.
6. We guarantee training for each user, not just key users. We guarantee free re-training if the group's progress is less than 75%.
7. We create all the project documentation and audio recordings of the project progress, while we always transfer the documents to the customer, including a description of all the settings and improvements made in the system, and we write the Technical Task in a language that is understandable for business.
8. Our work can be supervised by 1C and Qlik, ensuring the quality of work "from the vendor".
9. We receive payment based on the results of the provision of services and provide the opportunity to obtain a guarantee of securing the contract.

10 years of practical experience of our team = over 7,000 users in our projects within Central Asia (here are some of them):
